EXPLANATORY NOTES

1. **Source of Data:** Import statistics are compiled from information appearing on customs import entries and invoices, except for data on electricity. Electricity imports are reported directly by the importing firms to the Dominion Bureau of Statistics.

2. **Coverage:** From January 1, 1964, import statistics include most goods cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses rather than being cleared for consumption on arrival. For 1963 and earlier years import statistics included goods cleared immediately on arrival plus goods cleared out of customs warehouses. The two types of record eventually cover the same totals, except for a small amount of goods which is entered into customs warehouses and then re-exported. There may, however, be an important difference in the time at which warehoused goods are recorded as imports; some shipments which enter customs warehouses remain there for several months before clearance.

The following commodity movements are excluded from import statistics (some of these are recorded separately as Special Transactions—Non-trade in Table 3 of this report): gold and gold products where the value of the gold content is 80 per cent or more of the total value (a small amount of gold scrap in the form of jewellers' sweepings is included in class 258-99); current coin; settlers' effects; private donations and gifts; tourists purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada (or brought back by Canadian armed forces or diplomats returning from postings outside Canada); temporary imports for exhibition or competition (and film imported for exhibition or processing or returned after exhibition or processing abroad); ships of British construction and registry imported for use in Canada, and ships and aircraft purchased for use as international carriers but not used to carry goods between points in Canada, bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory.

3. **Countries credited:** Imports are credited to the country in which the goods were located when first directed to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.

4. **Quantities:** Units of quantities used in this report are those specified for each class in the Import Commodity Classification, Vol. I, (DBS Catalogue No. 12-524). Where no unit of quantity is specified, a small dash appears in the quantity columns. Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain cases otherwise defined in the Customs Tariff. Units of number refer to the number of complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit cannot be calculated). All units of quantity used in Canadian import statistics are defined on page 7 under "Abbreviations, Definitions and Units of Quantity".

5. **Values:** The value of goods imported is usually the value as determined for customs duty. In most cases, this corresponds to the value shown on the invoice accompanying the

NOTES EXPLICATIVES

1. **Source des données:** La statistique des importations est tirée de renseignements qui paraissent dans les déclarations et les factures de douane, sauf dans le cas des importations de l'électricité. Les importations de l'électricité sont déclarées directement par les compagnies importatrices au Bureau fédéral de la statistique.

2. **Couverture:** La statistique des importations comprend depuis le 1er janvier 1964, presque toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane à leur arrivée, au lieu d'être immédiatement dédouanées. Pour 1963 et les années antérieures, la statistique des importations comprend les marchandises dédouanées dès leur arrivée plus les marchandises dédouanées des entrepôts de la douane pour consommation. Eventuellement, les deux formes de documents donnent les mêmes chiffres, sauf dans le cas d'une petite quantité de marchandises entreposées à la douane et ensuite réexportées. Il peut y avoir, toutefois, une grande différence entre le moment où les marchandises sont entreposées et celui où elles sont consignées comme importations; certaines marchandises entreposées à la douane attendent leur dédouanement pendant plusieurs mois.

Les mouvements de marchandises suivants sont exclus de la statistique des importations (certains sont classés séparément comme transactions spéciales—hors commerce au Tableau 3 du présent rapport): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale (une petite quantité de déchets d'or sous forme de balayures de bijoutiers est comprise dans la classe 258-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par les forces armées ou les diplomates étrangers en poste au Canada (ou rapportées par les forces armées ou les diplomates canadiens rentrant de leur service hors du Canada); les importations provisoires pour expositions et concours (et les films importés pour projection ou développement ou retournés à l'étranger après projection ou développement); les navires de construction et d'immatriculation britanniques importés pour usage au Canada, et les navires et les avions achetés pour usage comme transporteurs internationaux et non pour le transport de marchandises d'un endroit à un autre au Canada, les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions; en général toutes les importations provisoires et les marchandises ne faisant que passer par le territoire canadien.

3. **Pays de provenance:** Les importations sont créditées au pays où les marchandises étaient situées avant leur acheminement vers le Canada, sauf les marchandises produites en Amérique centrale ou en Amérique du Sud et expédiées au Canada des États-Unis, lesquelles sont attribuées au pays d'origine.

4. **Quantités:** Les unités de quantités employées dans le présent rapport sont celles déterminées pour chaque classe dans la "Classification des marchandises d'importations", Vol. I (B.F.S. numéro de catalogue 12-524). Lorsque l'unité de quantité n'est pas requise, un petit tiret s'inscrit dans les colonnes de la quantité. Les unités de poids ou de volume visent le poids ou le volume des marchandises à l'exclusion de l'emballage nécessaire à l'expédition, sauf dans certains cas spéciaux définis dans le Tarif douanier. Les unités de nombre visent le nombre d'articles complets (ou suffisamment complets) importés, sauf les pièces de rechange (dans toute catégorie où la valeur inscrite comprend les unités complètes et leurs pièces, la valeur moyenne par unité complète ne peut être calculée). Toutes les unités de quantité employées dans la statistique canadienne des importations sont expliquées en page 7 sous la rubrique "Abbreviations, définitions et unités de quantité".

5. **Valeurs:** Ordinairement, la valeur des marchandises importées est la valeur déterminée pour fins de douane. Dans la plupart des cas, la valeur en douane correspond à la valeur indiquée

goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing on the date on which the goods were actually despatched to Canada). The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but in recent years importers have often reported c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics in the following cases: goods subject to dumping duty (from January, 1959); raw cotton and crude petroleum (from January, 1962, retroactive to January, 1960); raw sugar (from January, 1963, retroactive to January, 1961); and all shipments individually valued at \$100,000 or more (from January, 1964). Only about one fifth of the value of imports is covered by those specific checks.

6. **Abbreviations:** Many descriptions of countries and regions used in this volume are abbreviated. A key to abbreviations of countries and regions appear on page 8.

sur les factures qui accompagnent les marchandises, convertie en dollars canadiens au taux d'échange autorisé (habituellement le taux commercial à la date où les marchandises ont été effectivement expédiées au Canada). La loi canadienne sur les douanes exige généralement l'évaluation des marchandises f.à.b. au point d'expédition dans le pays exportateur mais, ces dernières années du moins, les importateurs ont souvent déclaré la valeur c.a.f. pour les marchandises en franchise ou les marchandises sujettes à un tarif déterminé. On s'efforce d'assurer que la valeur f.à.b. soit régulièrement employée dans la statistique des importations suivantes: les marchandises sujettes au tarif de dumping (depuis janvier 1959) le coton brut et le pétrole brut (depuis janvier 1962, avec effet rétroactif à janvier 1960); le sucre brut (depuis janvier 1963, avec effet rétroactif à janvier 1961); et toutes les expéditions évaluées à \$100,000 ou plus chacune (depuis janvier 1964). Ces contrôles déterminés ne couvrent qu'un cinquième environ de la valeur des importations.

6. **Abréviations:** Plusieurs descriptions de pays et de régions utilisées dans le présent volume sont abrégées. La clef aux abréviations visant les pays et les régions est donnée en page 9.
